

# Shubhanga CS

Developer | Web, Mobile and AI

+91 8618245446 | [developer.shubhangcs@gmail.com](mailto:developer.shubhangcs@gmail.com) | [linkedin.com/in/shubhangacs](https://linkedin.com/in/shubhangacs) | [github.com/Shubhangcs](https://github.com/Shubhangcs)

## SUMMARY

Developer with **1+ Years of Experience** shipping products in **Web, Mobile and AI**, with experience across **SaaS, IoT and Fintech** systems. Worked end-to-end from idea to architecting to building systems that **Work Reliably in Production and Scale Seamlessly**, collaborating with **Diverse Cross-Functional Teams**.

## EDUCATION

**Visvesvaraya Technological University**

B.Tech in Computer Science and Engineering - CGPA: 8.3

Mangalore, Karnataka

Nov 2021 – May 2025

## EXPERIENCE

**Epicode**

Jun 2024 – Jul 2024

Web Development Internship

- Took responsibility of converting Figma design into a fully functional **CPaaS portal** using **SvelteKit** and **Tailwind**.
- Built **Custom Components and Animations** that closely matched the provided design specifications.
- Optimized code before deployment by applying **Reusability Principle** and removing **Unnecessary Dependencies**.

**Vithsutra Technologies**

Aug 2024 – Oct 2025

Software Developer

- Led a team of **5 Software Engineers**, taking full ownership from **Building to Deployment and Maintenance**.
- Built **Microservices for IoT Systems** handling **High Traffic**, and defined the **New Tech Stack** in company.
- Directly interacted with **Clients** to understand problems and turned them to **Technical Requirements** for the team.

**Levion Studio**

Nov 2025 – Present

Technical Co-Founder

- Built a variety of projects across **Fintech, E-commerce, and AI**, leveraging **Latest Technologies** in the market.
- Led the **Complete Tech Team** and was responsible for **All Technical Decisions** within the company.
- Worked closely with **End Customers** to build **Tailored Solutions** that genuinely solved their problems.

## PROJECTS

**Repurpose AI** | *TypeScript, NextJS, Postgres, Bun, AWS S3, Deepgram, Gemini*

Jun 2026

- Built a complete **AI SaaS platform** for text-based creators on **LinkedIn, Instagram, and Twitter**, enabling them to convert video, audio, or long-form articles into multiple pieces of content for regular posting.
- Developed the frontend using **Next.js** and the backend on **Bun runtime**, hosted on **AWS**.
- Integrated **Deepgram** for speech-to-text and the **Gemini API** for automated post generation.

**Betterenv** | *Golang*

May 2026

- Built a complete **Go library** that simplifies working with **Environment Variables (ENV)**, offering a wide range of **Built-In Helper Functions**.
- Built entirely using the **Go Standard Library**, with a **Custom Parser Written from Scratch**; used **AI-Assisted Coding** for parts of the implementation.

**Rural Fintech Portal** | *TypeScript, React, Golang, Postgres, AWS, Docker, NGINX, Github Actions* Jan 2026

- Built a complete **Financial Management System** for rural fintech using **NPCI APIs** for services including **DMT, AEPS, and BBPS**.
- Architected a robust system with **RBAC (Role-Based Access Control)** for multiple roles **Admin, MD, Distributor, and Retailer** while ensuring **Consistent Transaction Handling** throughout.

## TECHNICAL SKILLS

**Languages:** Golang, TypeScript, JavaScript, Dart, Python, SQL

**Frameworks:** React, Next, Node, Bun, Flutter

**Developer Tools:** Git, Docker, GitHub Actions

**AI APIs:** Gemini, OpenAI, Claude

**Cloud Platforms:** AWS, Digital Ocean, GCP
